

## **6.- SPANISH CLASSROOM**

This is the Spanish classroom at school. Here you will learn Spanish with those of your classmates who are either from your own country or another one.

Here we will teach you Spanish both to help you interact with your friends and classmates and, also, so you'll understand your school subjects such as Mathematics, Physics or Chemistry.

In class, we work in different ways such as in groups or individually, and we use many different materials such as books, maps, boards or murals, always from the perspective of communication, so that you can successfully tackle your school subjects.

It's very important that you always do your homework, and also that you also ask about anything you don't understand. Don't be in doubt, it's not a problem, your teacher will explain it to you.

You'll make mistakes at the beginning: you'll have the impression you aren't making yourself understood, but don't worry because that's normal at the beginning. You need to make mistakes to learn little by little. Above all, you have to talk: try to talk whenever you can, because this is the best way for you to learn Spanish.

We use a lot of different materials in class such as videos, music tapes, DVDs, CDs, computers...and it is very important for you to learn Spanish. It's going to be very useful for you, so you should try to make use of any chance you have to be able to listen and practise Spanish such as watching TV, going to the cinema, talking to your friends, doing sport... Everything you do in Spanish will help you to learn.
